YOUR CUSTOM SMILE DESIGN

Dr. Sowell recognizes that smiling is a very personal experience. That's why he is scrupulous in taking the time to properly **PERFECT A SMILE** for his patients. He encourages his patients to bring in a photograph of the smile of a model or celebrity they particularly like. From there, the size, length, color, symmetry, and shape of the teeth and gum will be selected and the patient's lip line, jaw angle, eye position and profile are evaluated. After the **SMILE DESIGN EVALUATION** is completed, Dr. Sowell designs the custom smile together with his **IN-HOUSE LABORATORY CERAMIST** on models for his patients to try out for a trial so they can see their new smile. Afterward, the shape of the temporaries are made into final form.
