

Mark A. Sowell, D.D.S., M.A.G.D.

AESTHETIC DENTISTRY

Dr. Mark Sowell understands you shouldn't settle for anything less than perfection when it comes to your smile.

Helping him achieve perfection, one tooth at a time, is the new, state-of-the-art, FDA-approved laser, Waterlase MD which eliminates the very things that keep people from going to the dentist—pain, bleeding, discomfort, and swelling following a procedure. The only laser of its kind, its innovative technology allows Dr. Sowell to complete a procedure, such as a filling or gum contouring, with exact, microscopic precision. The laser's ComfortJet air/water delivery system provides patients with maximum comfort, and its LED light technology ensures pinpoint accuracy. Dr. Sowell has experienced tremendous patient

results in procedures ranging from fillings and treatment of gum disease to smile makeovers.

With more than two decades of experience, Dr. Sowell is one of roughly 230 dentists in the U.S. with accreditation from the American Academy of Cosmetic Dentistry, the highest recognition of its kind for aesthetic dentists. He is also one of about 900 U.S. dentists with a Masterfellowship from the Academy of General Dentistry, the most supreme level of recognition of training in all eight specialties.

He believes in doing things right the first time, and his stellar reputation is built on his comment to excellence. Who better to create your perfect smile?
